Experience

November 2020 - Present

Programmer Analyst

Trackmobile LLC

- maintained customer facing website and dealer portal website (WordPress, HTML, CSS, Bootstrap, JavaScript).
- implemented and maintained Raspberry Pi's for internal company information and communication
- created and integrated Trackmobile Inspection Report Web Application, Service Notes Web Application, Internal System Web Application, and Quote Tool (WISA statck)
- use of SYSPRO 7 as ERP system to manage and track transactions.
- creation of rudimentary web scrapper to gather sale data (Python)
- implemented open source project Tiny File Manager and File Gator to host machine data.
- Handled the installation of many computing and networking devices within the company.

May 2017 - July 2019

Inspection Logistics Coordinator

IronPlanet/Ritchie Brothers Auctioneers

- Assigned in-field inspectors to complete inspections on various heavy machinery throughout the southern United States.
- Directed the contract inspector invoice process for inspectors working in the southern United States.
- Special project liaison between software engineers and inspectors in the development of IronPlanet's inspection application.
- Developed various tools using Excel VBA to accomplish tasks more efficiently.

July 2019 - November 2020

Strategic Account Sales Coordinator

IronPlanet/Ritchie Brothers Auctioneers

- Completed requests and listings to support sales reps and cooperated with various departments to complete requests outside scope of tasks.
- Created and managed sales reports, seller and buyer statements, and asset trackers that lead to over \$200 million in gross transaction value (2nd within the company).

Sept 2016 - May 2017

AV/ Event Coordinator

IronPlanet/CAT Auction Services

- Prepared and facilitated auctions that were in the U.S and abroad.
- Used Excel to track all expenditures of the auctions.
- Fostered relationships with various vendors to acquire materials and schedule deliveries.
- Managed and organized IT equipment that was used for gaining and maintaining an internet connection for the online auctions.
- Worked with many units of audio and visual setup that would record the auctions.

May 2015 - August 2015

Programmer/ IT Analyst Intern

IronPlanet

- Programmed and manipulated code of company intranet and mobile website using ASP, SQL, JavaScript, and HTML.
- Worked directly with the VP of Information Technology to implement more than 20 projects
- Collaborated with multiple departments to determine system enhancement goals, furthering company efforts in growth and efficiency.

Projects

- Completed work on Auction Progress Report and Inspection Logistics Tracker, tools to assist in tracking the completion of inspections and selling of heavy construction equipment, using Excel VBA.
- Successful integration of the Trackmobile Inspection Report web application, Service Notes web application, and Quote Tool web application created using the ASP.NET CORE MVC framework (WISA stack).
- Completed revision of Sales and Marketing touchscreen application at Trackmobile
- Created personal website using HTML, CSS, Bootstrap, and JavaScript (jQuery) (<http://chrisbeno.com/>).
- Developed application in Visual Studio 2019 called Crypto Bank that takes a string of text for a user and transfigures into unreadable text for security (<https://github.com/cbeno68/Crypto-Bank-VS>). Has been published to the Google Play Store.
- Created Xamrin Form application in Visual Studio 2019 to grab the GPS location of a users current location (<https://github.com/cbeno68/Geo-Punch>)

Education

Spring 2017

Shorter University Master of Management

Spring 2015

Shorter University Bachelor of Science Computer Information Systems

Awards
